

### Introduction of board

The MAIX Bit development board is designed with module + backplane, neat and compact, on-board Type-C interface and USB-UART circuit, users can directly connect to the computer for development through USB Type-C cable. It comes with configure 128Mbit Flash, LCD, DVP, Micro SD card, etc. Interface and lead out all 10, convenient for users to expand.

- 1-- USB Type-C
- 2-- MEMS microphone
- 3 -- K210 main control chip
- 4 -- 8bit LCD
- 5 -- DVP 24P
- 6 -- USB to UART chip
- 7 -- 128Mbit Flash
